Rationale & Objective:

The primary aim of this course is to help technical students studying in Polytechnics and Engineering Institutes acquire the skills of language and communication in order to be successful in their studies and subsequent professional life. It has been found that in the world of work of diploma holder they have to perform various job functions like Letter Writing, maintaining office records, drawing up tender notices, writing technical reports, communicating with sub-ordinate staff and/or labourer and with superiors.

The curriculum has been designed to improve the knowledge of the Language, comprehension and its application to develop communication skill.

The curriculum also seeks to develop the student's power of oral communication through effective use of body language and necessarily puts knowledge to practice through exposure in varied form.

The curriculum has been designed both in English & Hindi languages.
